Dedicated Informatics and Computing Engineering graduate with expertise in full-stack development, databases, and agile methodologies. Currently pursuing a Master's in Network and Information Systems Engineering.

Actively seeking a part-time role that allows me to apply my skills while continuing my studies, preferably in software development, backend engineering, or related areas.

EDUCATION

PRESENT STUDIES

MASTER'S IN NETWORK AND INFORMATION SYSTEMS ENGINEERING

Faculty of Sciences, University of Porto (FCUP) | 2024-2027 (Expected)

- Advanced networking, distributed systems, cybersecurity

PREVIOUS STUDIES

Bachelor in Informatics and Computing Engineering

Faculty of Engineering, University of Porto (FEUP) | 2021-2025

- Relevant coursework: Algorithms, Software Engineering, Web Development, Databases, IA, Graphic Computing

WORK

EXPERIENCE

SOFTWARE DEVELOPMENT INTERN

Visma Tech Portugal - Porto, Portugal

July 2025 - August 2025

- Contributed to the development of VisionPlanner, a SaaS product for accounting, by implementing backend features in .NET (C#) and integrating frontend components in React.
- Delivered two real user stories, including a critical bug fix for access control and a new feature for automatic user role assignment across distributed services.
- Participated in Scrum ceremonies (planning, dailies, reviews), wrote unit tests, and collaborated via Git, Azure DevOps, and Jira in a professional agile environment.

TECHNICAL

SKILLS

- **Programming:** C/C++, Java, Python, .NET, React/JS, PHP, HTML/CSS, Dart, Flutter, Haskell
- **Tools:** Git, Jira, Docker, Databases, REST APIs, Agile/Scrum, Microservices
- **Soft Skills:** Leadership, teamwork, adaptability, problem-solving
- **Languages:** Portuguese (Native), English (Fluent), Spanish (Basic)

PROJECTS

SprintHive - a Project Management Platform (PHP, JavaScript, MySQL)

- Developed a Laravel-based platform enabling task management and team collaboration, improving workflow efficiency
- This platform empowers users to create and manage projects, define tasks, and foster communication.
- Applied agile methodologies for iterative development.

Java-- Compiler (Java, ANTLR, Jasmin, JVM)

- Designed and implemented a three-stage compiler: frontend (lexing/parsing), intermediate (OLLIR IR), and backend (Jasmin bytecode).
- Output produces executable JVM bytecode from Java-- source.
- Applied optimizations and ensured semantic correctness across stages.

Distributed Chat System (Java, LLM)

- Designed and implemented a multi-user client-server chat system using modern Java (SE 21) and virtual threads for efficient concurrency.
- Integrated AI-powered chat rooms using a local LLM (via Ollama) for contextual, automated replies.
- Enabled secure communication via SSL/TLS (javax.net.ssl) and ensured thread-safe room management with ReentrantLocks.

ADDITIONAL INFORMATION

More projects can be seen on my Github page.

- **Interests:** Cybersecurity, AI, Music, Pop Culture
